

Cabinet Accessory - Brush Blanking Panel

Airflow management and heat mitigation are two major concerns in every data center. The best way to ensure cabinets provide the best possible heat mitigation is to block off any unused cabinet spaces with blanking panels. Meanwhile, the bristle allows cables to pass through it. The Inova Brush Blanking Panels are designed to provide our customers with a high-quality airflow management and cable feedthrough solution.

PRODUCT APPLICATIONS

- Low-density applications where there are extra spaces and cables in the front of a cabinet
- Any application where airflow and heat mitigation are a concern

PRODUCT FEATURES

- Engineered from high-quality, solid metal and UL94-V0 bristle
- Universal usage fit with any brand cabinet that is 19-inch and EIA-310E conformance
- Bristle area allows cables to pass through it
- Pack with installation hardware
