

## RF Shielded Accessory Modulares - Wave Tube

SKU#: INV07-3000X

Inova series Wave Tube is designed for shielding non-metallic cables in cabinets over the wall, for fiber optic, infrared emitters and other equipment to provide a pathway that does not affect the shielding performance. According to different shielding requirements and physical parameters of the line over the wall, we can design and produce a variety of specifications for users of standard or non-standard models of Wave Tube.

### PRODUCT CONFIGURATIONS

- Brass Wave Tube
- Water Wave Tube
- Fiber Cable Wave Tube
- Stainless Wave Tube
